Hong Kong: The Facts

Employment

Hong Kong has an area of 1 114.57 square kilometres and a population of about 7.52 million in mid-2024. Despite its small size, Hong Kong was ranked the 7th largest trading entity in the world in 2024. The total value of visible trade amounted to \$9,464.5 billion in 2024. During the period of 2014 to 2024, the Gross Domestic Product (GDP) grew at an average annual rate of 1.1 per cent in real terms, to \$3,058.1 billion (in chained (2023) dollars) in 2024. Per capita GDP at current market prices reached \$421,990 (US\$54,080).

The size of the total labour force⁺⁺ in 2024 was 3.81 million, of whom 49.2 per cent were male and 50.8 per cent were female. This represented 57.0 per cent of the total population aged 15 and over⁺⁺.

Employment Distribution: Total employment in the fourth quarter of 2024 was 3.7 million. The employment distribution among various industry sectors was as follows:

	Percentage of
Industry sector	employment distribution
•	
Manufacturing	2.0
Construction	9.5
Import/export, wholesale	24.0
and retail trades; and	
accommodation and	
food services	
Transportation, storage,	10.7
postal and courier services;	
and information and	
communications	
Financing and insurance;	22.6
real estate; and professional	
and business services	
Public administration; and	30.7
social and personal services	
Others	0.5
Total employment	100.0

Wages: The Minimum Wage Ordinance establishes the Statutory Minimum Wage regime to provide a wage floor which forestalls excessively low wages without unduly jeopardising Hong Kong's labour market flexibility, economic growth and competitiveness, and minimising the loss of low-paid jobs. The Statutory Minimum Wage rate increased to \$42.1 per hour on May 1, 2025.

In May-June 2024, the median monthly wage of employees in Hong Kong (excluding government employees as well as student interns, work experience students and live-in domestic workers as exempted by the Minimum Wage

Ordinance) was \$20,500, increased by 3.6 per cent compared with May-June 2023.

Labour Legislation and Standards: The Government puts in place extensive labour legislation to protect employees' rights and benefits as well as occupational safety and health.

Hong Kong applies relevant International Labour Conventions (ILCs) as the local circumstances allow. As at end-2024, Hong Kong applied 31 ILCs. This is comparable with neighbouring places with similar economic development as well as social and cultural background.

Working Conditions: The Employment Ordinance provides a comprehensive code of employment. It governs the payment of wages, the termination of employment contracts, the operation of employment agencies, etc. The law provides eligible employees with various benefits and protection such as rest days, paid statutory holidays, paid annual leave, sickness allowance, paid paternity leave, maternity protection and employment protection. In addition, the law provides protection to employees participating in trade union activities, severance payment to employees made redundant and long service payment to workers with long service who are dismissed or resign on grounds of ill health or reaching the age of 65 or above, etc. Employees who are owed wages, wages in lieu of notice, severance payment, pay for untaken annual leave and/or pay for untaken statutory holidays by insolvent employers may apply for ex gratia payment from the Protection of Wages on Insolvency Fund. The Fund is financed mainly by a levy per annum on each business registration.

The Employment of Children Regulations prohibit the employment of children aged under 13 in all economic sectors. Subject to certain protective restrictions, children aged 13 and 14 may take up employment in the non-industrial sectors.

The Employment of Young Persons (Industry) Regulations govern the hours of work and employment conditions of young persons aged 15 to 17 in industrial undertakings. For example, these young persons are not allowed to work more than eight hours a day and 48 hours a week. Overtime work for them is also prohibited.

Labour Inspectors of the Labour Department conduct workplace inspections to monitor employers' compliance with various labour laws to safeguard the rights and benefits of local and imported workers.

Trade Unions and Labour Relations: Hong Kong residents have the right and freedom to form and join trade unions. As at end-2024, there were 1 429 trade unions registered under the Trade Unions Ordinance, consisting of 1 353 employee unions, 11 employer associations, 48 mixed organisations of employees and employers and 17 trade union federations.

Hong Kong has a sound record of labour relations. Problems between employers and employees can usually be resolved through mutual agreement or conciliation. In 2024, the Labour Department handled 13 029 labour claims and disputes, most of which were related to disputes on termination and wages. Over 70 per cent of the cases with conciliation service rendered were settled.

Adjudication of Claims: A quick, inexpensive and informal procedure for adjudicating disputes between employers and employees is in place in Hong Kong. The Minor Employment Claims Adjudication Board of the Labour Department adjudicates claims for rights under the Employment Ordinance, the Minimum Wage Ordinance and individual employment contracts. Each of the claims heard by the board shall involve not more than 10 claimants for a sum not exceeding \$15,000 per claimant. Claims exceeding such limits are heard by the Labour Tribunal. Under the Judiciary, the Labour Tribunal deals with claims arising out of a breach of a contract of employment and the relevant provisions of the Employment Ordinance, the Minimum Wage Ordinance or the Apprenticeship Ordinance.

Occupational Safety and Health: Through inspection and enforcement, education and training, publicity and promotion, making use of innovation and technology, as well as collaboration with relevant stakeholders, the Occupational Safety and Health Branch of the Labour Department seeks to reduce work accidents and prevent occupational and work-related diseases to safeguard employees' safety and health at work.

Under the Occupational Safety and Health Ordinance and the Factories and Industrial Undertakings Ordinance, 32 sets of regulations have been made to cover various aspects of hazardous work procedures in factories, building and engineering construction sites, catering establishments, commercial premises and other workplaces.

In 2024, 145 800 inspections and 20 017 accident investigations were conducted by Occupational Safety Officers. Altogether, 2 890 summonses were heard with fines totalling \$21 million. The Labour Department conducted in-depth surprise inspections targeting construction sites with high-risk work processes or poor safety performance to scrutinise the safe system of work and the safety management system of duty holders. The department continued to participate actively in site safety management committee meetings of major public work projects to more effectively and efficiently keep close tabs on the projects' occupational safety and health (OSH) conditions and risks. Moreover, the department stepped up area patrols to combat high-risk work processes of repair, maintenance, alteration and addition works, including unsafe work-above-ground activities.

To enable the conduct of inspections in a more targeted manner, the Labour Department runs an online OSH complaint platform to facilitate employees and members of the public to report unsafe working conditions using mobile electronic devices, so that the department can conduct prompt follow-up actions. In 2024, a total of 1 395 OSH complaint cases were received through the platform.

In April 2024, the Labour Department revised the Code of Practice on Safety Management to provide more practical guidance to duty holders on regulatory compliance. Meanwhile, given that bamboo scaffolding work is a high-risk process, the Labour Department also revised the Code of Practice for Bamboo Scaffolding Safety to strenghthen safety in bamboo scaffolding works. The major revisions included enhancing technical requirements for scaffolds; clarifing the supervision responsibilities for competent persons in scaffolding works and inspections prior to inclement weather; and mandating that all workers engaged in truss-out bamboo scaffolding works hold valid "Advanced" or "Intermediate" Level Truss-out Scaffolder Safety Training certificates issued by the Construction Industry Council.

To enhance the safety and health in confined space work, the Labour Department revised the Code of Practice for Safety and Health at Work in Confined Spaces which was gazetted on May 31, 2024, and was effective on November 30, 2024, after a grace period of six months. The revised Code of Practice for Safety and Health at Work in Confined Spaces strengthens the requirements for contractors to supervise work in confined spaces. In addition, the Labour Department has revamped the content of mandatory safety training courses for confined space operations by extending the course durations and shortening the validity period of the related certificates to allow practitioners to refresh their safety knowledge more frequently and keep abreast of new legal developments.

In 2024, 2 379 seminars, courses and talks for over 137 644 participants were organised to help them better understand OSH knowledge and the relevant laws. Safety and health publications were also distributed to members of the public through various offices and channels. The Labour Department launched a number of large-scale promotional activities including safety award scheme and catering industry safety promotional campaign to enhance OSH awareness in the construction and catering industries respectively, and cohosted the first OSH Innovation & Technology Expo with the Occupational Safety and Health Council (OSHC) in March 2024, introducing and showcasing innovative solutions, products, and technologies in OSH. The Labour Department launched largescale thematic promotional campaigns through various forms and channels, including websites, "OSH 2.0" mobile application, emails, TV, radio, newspapers, public transportation, public facilities, shopping malls, external walls of buildings and screens. The Labour Department also collaborated with the OSHC, the CIC and major media outlets to produce TV and radio announcements.

To reduce the risk of heat stroke at work, the Labour Department issued the Guidance Notes on Prevention of Heat Stroke at Work and launched the Heat Stress at Work Warning (HSWW) based on the Hong Kong Heat Index. In 2024, the HSWW system was further optimised to link with the Hong Kong Observatory's "Extremely Hot" special alert and to fine-tune the cancellation mechanism of HSWW. A promotional campaign on the prevention of heat stroke at work has been organised to promote the prevention of occupational and work-related diseases. The Labour Department also continued to collaborate with the OSHC to implement various sponsorship schemes to promote OSH including the Enhanced Light-duty

Working Platform Sponsorship Scheme for small and medium enterprises (SMEs), the SME Sponsorship Scheme for Fall Arresting Equipment for Renovation & Maintenance Work and Construction Industry, the Tool Lanyard Sponsorship Scheme for SMEs, the Cooling Products for Preventing Heat Stroke Sponsorship Scheme for SMEs, and the brand new Telescopic Scaffold Tower Sponsorship Scheme for SMEs.

To enhance the effectiveness of publicity and promotion, the Labour Department has been producing Work Safety Alert in the form of animation videos to enable the industry to better comprehend how accidents happened and the necessary precautionary measures to be taken for preventing recurrence of accidents. Besides, the Labour Department supported workers' organisations in staging roving exhibitions, with a view to disseminating information about the risks of work-at-height and corresponding safety measures to employers and workers of the construction industry.

As for clinic services, the Labour Department's two Occupational Health Clinics provided a total of 13 551 clinical consultations to workers in 2024.

Employees' Compensation: Under the Employees' Compensation Ordinance, an employer is liable to pay compensation to an employee who sustains a personal injury arising out of and in the course of employment or to eligible family members of an employee who dies as a result of an accident at work. All employers are required to have valid employees' compensation insurance policies to cover their liabilities under the laws (including the common law).

The Employees' Compensation Division of the Labour Department administers the Employees' Compensation Ordinance. In 2024, the division handled 244 fatal accident cases and 41 254 non-fatal cases. Among these non-fatal cases, 11 855 were minor injury cases with sick leave not exceeding three days. The division also provides administrative support to Employees' Compensation Assessment Boards which assess the percentage of permanent loss of earning capacity suffered by injured employees. In addition, the division offers assistance to persons who have contracted pneumoconiosis and/or mesothelioma or, in case of their death, their eligible family members to obtain compensation from the Pneumoconiosis Compensation Fund Board which is financed by a levy on the construction and quarrying industries.

Employment Services: The Labour Department's Job Centres across the territory, three industry-based Recruitment Centres for the catering, retail and construction industries, the Job Vacancy Processing Centre, the Telephone Employment Service Centre, the Interactive Employment Service (iES) website (www.jobs.gov.hk) and its mobile application, as well as vacancy search terminals located in various sites throughout the territory provide diversified and free employment and recruitment services to job seekers and employers.

Job seekers may meet employment officers to obtain personalised employment advisory services. Employment officers provide them with job search advice as well as information on labour market and training/retraining courses, support them in conducting career aptitude assessments, etc. in accordance with their needs and preferences, and match them to suitable jobs.

The Labour Department implements various employment programmes, including the Youth Employment and Training Programme, the Re-employment Allowance Pilot Scheme, the Employment Programme for the Elderly and Middle-aged, the Employment Services Ambassador Programme for the Ethnic Minorities, the Racial Diversity Employment Programme and the Greater Bay Area Youth Employment Scheme, to provide employment support to specific clienteles. Moreover, the Labour Department organises large-scale and district-based job fairs to facilitate job seekers to apply for jobs and attend interviews with employers on the spot.

Through the iES website, employers and job seekers may submit vacancy information and search jobs on the web respectively. There are also dedicated webpages to disseminate employment information of topical interest to job seekers. In tandem, job seekers can use the iES mobile application to look for suitable vacancies anytime and anywhere, and to receive regular notifications of updated job vacancies that match their preset criteria as well as information on job fairs.

In 2024, the department recorded 815 890 vacancies from the private sector and achieved 121 543 placements.

Employment Assistance to Persons with Disabilities: The Selective Placement Division of the Labour Department provides specialised employment assistance to persons with disabilities who are fit for open employment. In 2024, the division recorded 3 214 registrations and achieved 2 300 placements. The Labour Department also administers the Work Orientation and Placement Scheme which encourages employers to offer job vacancies to persons with disabilities through the provision of allowance.

The following notes are used in this fact sheet:

++ Figures are compiled based on data collected in the General Household Survey from January to December of the year concerned as well as the mid-year population estimates. The General Household Survey covers the land-based non-institutional population of Hong Kong.
