

Proposed Updates to Safety Standards for Toys and Children's Products

The Government proposes adopting up-to-date safety standards promulgated by the relevant standards institutions for toys and some children's products listed in Schedule 2 ("Schedule 2 products") under the Toys and Children's Products Safety Ordinance (Cap. 424) ("the Ordinance"). We are seeking comments on the proposal.

2. The Ordinance stipulates that a person must not manufacture, import or supply a toy or Schedule 2 product unless it complies with all the applicable requirements contained in any one of the safety standards (international standards or standards adopted by major economies) specified in Schedules 1 and 2 respectively to the Ordinance. We keep in view updates to the standards so as to apply up-to-date, operative versions to products supplied in Hong Kong.

3. It has come to our attention that the specified standards for toys and for five classes of Schedule 2 products have been updated/amended to new versions as follows -

Toy Standards –

- (a) a new part of the International Standard, "ISO 8124-7:2015 Safety of toys – Part 7: Requirements and test methods for finger paints", has been published;
- (b) the existing part of the European Standard "BS EN 71-5:2013" has been updated to "BS EN 71-5:2015";
- (c) a new part of the European Standard, "BS EN 71-13:2014 Safety of Toys – Part 13: Olfactory board games, cosmetic kits and gustative games", has been published; and
- (d) the existing part of the European Standard "BS EN 62115:2005+A11:2012" has been updated to "BS EN 62115:2005+A12:2015".

Schedule 2 Product Standards –

- (a) the existing European Standard (a) "BS EN 747-1:2012" for *bunk beds for domestic use* has been updated to "BS EN 747-1:2012+A1:2015";

- (b) the existing European Standard (b) “BS EN 747-2:2012” for *bunk beds for domestic use* has been updated to “BS EN 747-2:2012+A1:2015”;
- (c) the existing ASTM Standard “ASTM F1004-13” for *child safety barriers for domestic use* has been updated to “ASTM F1004-16b”;
- (d) the existing ASTM Standard “ASTM F404-14a” for *children’s high chairs and multi-purpose high chairs for domestic use* has been updated to “ASTM F404-16a”;
- (e) the existing International Standard (a) “ISO 9221-1:1992” for *children’s high chairs and multi-purpose high chairs for domestic use* has been updated to “ISO 9221-1:2015”;
- (f) the existing International Standard (b) “ISO 9221-2:1992” for *children’s high chairs and multi-purpose high chairs for domestic use* has been updated to “ISO 9221-2:2015”;
- (g) the existing ASTM Standard “ASTM F406-13” for *playpens for domestic use* has been updated to “ASTM F406-15”; and
- (h) the existing ASTM Standard “ASTM F833-13b” for *wheeled child conveyances* has been updated to “ASTM F833-15”.

4. The table attached at the Annex to this document summarises the major changes introduced by the latest standards^{Note}.

5. In 2014 and 2015 we did not propose to adopt a new part of the European Standard, “BS EN 71-13:2014 Safety of toys – Part 13: Olfactory board games, cosmetic kits and gustative games” in the Ordinance in order to allow sufficient time for developing complementary test methods. We note that the provision of relevant test services is now available. Therefore, we propose to adopt the new part in this exercise so as to keep the regulatory regime under the Ordinance on par with those in major economies.

6. If you have any comments on the proposal, please send them to us on or before **31 December 2016** by any of the following means:

^{Note} The table is prepared for general information only. Interested parties should refer to the standards for the detailed requirements.
